Re: Ice 32 Data Evaluation Performed at Budweiser Silver Eagle Dist. L. P.
Houston, Texas.

To: M/J Research:

As part of our ongoing performance testing with M/J Research, we are pleased to report the following results relative to the use of the ICE 32 A/C performance enhancer in our fleet.

As of 3/1/07, the Silver Eagle Fleet consists of approximately 425 units ranging from class VII single axle diesel tractors (211), class VIII tandem axle diesel tractors (32), minivans (1), utility vans (89), standard passenger automobiles (20) and ½ ton pick up trucks (5).

The objective of the ICE 32 evaluation was to determine the effects of the additive upon overall maintenance costs relative to A/C compressor repairs/replacements. Prior to the introduction of the ICE 32, overall yearly maintenance costs relative to A/C in terms of CPM (Costs Per Mile) was .003 CPM and the Life Cost relative to A/C repairs was .004 CPM.

ICE 32 was introduced into our entire fleet over approximately a three month interval (During regularly scheduled maintenance periods) beginning in June, 2002. Since inception of the ICE 32 test, there have been approximately (13,464,590) cumulative fleet miles logged and we are pleased to report that as of the date of this report, our yearly maintenance cost relative to A/C is .001 CPM which represents a 66% cost reduction and the Life Cost relative to A/C repairs is .002 CPM, a 50% reduction in cost from .004 CPM prior to using the ICE 32 product.

Prior to using ICE 32, we averaged replacing (20) compressors per year in our fleet. Since the introduction of ICE 32, we have not replaced a single compressor in our fleet for over two years.

In conclusion, we continue to be extremely pleased with the ICE 32 program and look forward to working with you in the future.

Sincerely,
